

With  
orthopaedic  
insoles

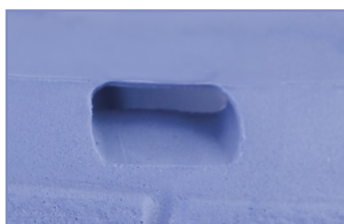

3-point fastening for a secure fit.

Orthopaedic insole supports your posture.

Simple fastening of the orthopaedic insole via a click system.

Special channels promote air circulation within the shoe.

## mediPlogs<sup>+</sup>: Good support starts with the insole

A special ventilation system keeps your feet cool

- ensures a pleasant environment for your feet
- the characteristics of the lateral ventilation holes prevent extensive penetration of liquids into the shoe

Always well-balanced due to the orthopaedic insole

- the ergonomic shape of the insole and its antibacterial textile surface provide exceptional support
- the insole supports your transverse arch, ensures that your foot does not slip forward and allows your toes to grip
- the shaped edge of the insole centres your foot and keeps it in the correct position

Machine washable up to 60 °C

- theatre shoes made of PU (polyurethane) are usually washed chemothermally at 60 °C with 1% disinfectant solution and a soaking time of 5 minutes

Made of anti-static PU

- foamed without CFC
- provides safety and protects the environment

Labeling service for mediPlogs<sup>+</sup>

- on request the mediPlogs<sup>+</sup> can be labeled with name/department abbreviation letters

Colour	Size	Pair/ packing unit	Item no. without heel strap*	Item no. with heel strap*
